The Lightning Round

Quantitative Reasoning II (INF 1220)

One slide, 4 minutes, 1 minute of questions

Everyone presents their project to their section. This is not graded. It exists so you see what your classmates did and practice explaining your work to people who have not read it.

1. When you present

Section	You present	Your slide is due
001 (MW 11:30)	Wednesday, November 4 or Monday, November 9	8:00am that morning
002 (TR 15:15)	Thursday, November 5	8:00am Thursday, November 5
003 (TR 08:30)	Thursday, November 5	8:00am Thursday, November 5

Section 001 presents over two days. Volunteers take November 4; sign up in class on November 2. Everyone who does not sign up presents on November 9.

2. The slide

One slide. Five things on it, in this order:

1. Your question.
2. Your data: what it is, what one row represents, and how many rows you have after your filters.
3. One table or one figure. Your best one.
4. Your answer, in a sentence somebody could disagree with.
5. The biggest limitation.

Keep the lines short, and make the exhibit large enough to read from the back of the room.

3. Turning it in

Put your name on the slide. Export it as a single-page PDF and upload it to Populi by 8:00am on the morning you present. I build one deck and run it from the front of the room; nobody connects a laptop. A blank template is posted with this handout.

4. The 4 minutes

Talk from the slide rather than reading it. Spend the time on what the slide does not show: why you asked the question, what you had to decide, and why you believe the answer as far as you do.

I stop you at 4 minutes wherever you are, so practice once out loud before you come. Then one question from the room or from me.

If your project did not come out the way you hoped, present that. A question the data could not settle is a result.
